

Weekly Report (2018.1.15-2018.1.21)

TASK	DEADLINE	CURRENT PROGRESS
可视交互引擎论文	2018.1月底	目前进展：完成一大部分中文内容组织与部分英文内容的组织
VR课程项目	2018.1.24	目前进展：配置好开发环境 计划：进行系统开发

DONE

1. Paper writing.

Organize some content in Chinese and give it to Kong to translate. And write some content in English.

2. Paper reading.

Semantic Enrichment of Movement Behavior with Foursquare—A Visual Analytics Approach.

This work suggests to enrich trajectory data with POI information using social media services and show how semantic insights can be gained. Furthermore, it shows how to handle semantic uncertainties in time and space, which result from noisy, unprecise, and missing data, by introducing a POI decision model in combination with highly interactive visualizations. It can be regarded as visualizing non-spatial data on spacial visualization.

3. VR course review.

Prepare for the exam on 1.23.

TODO

1. Review the VR course content and complete the VR project.

2. Complete the first draft of paper.
